

**VoiceOver IP Billing**

# D-HD

## High Density Billing

### D-TAC "HD" series Billing System

A complete post-paid CDR billing platform designed to work with traditional switches, IP switches, gateways, proxy servers, soft switches and boarder session controllers.

Providing a quality billing platform for high-density VoIP and TDM based CDR networks.

### Maximize Billing & Back Office Productivity

Built around billing and business automation, this software offers Telecom specific features to make operating your company easier. Each department within your organization is provided the screens, features & tools to allow for maximum productivity. From customer support systems to the rate management tools, the D-HD system provides the tools needed to get the job done. If you are looking for CDR management, powerful invoicing, cash receipts, carrier costing, ASR reporting, statistical route or trunk group information, then the D-TAC HD Billing System provides the answer.

### Hardware & CDR Compatibility

D-HD offers built-in CDR compatibility for Carrius Technologies, Cisco, NexTone, Quintum Technologies, Versatel Networks and other standard CDR formats. Wholesale class capabilities in high capacity mixed TDM and VoIP networks with requirements for handling millions of transactions.

### Technology & Customer Driven

Our technology and customer partnership commitment include ongoing research & product development to help keep you current with technology and to help provide new products and infrastructure for the ever changing needs of your customers.
